

The Latest in Our Smart Nation Journey - Exciting New Products and Services

Delivering Convenient, Streamlined, and Seamless Services

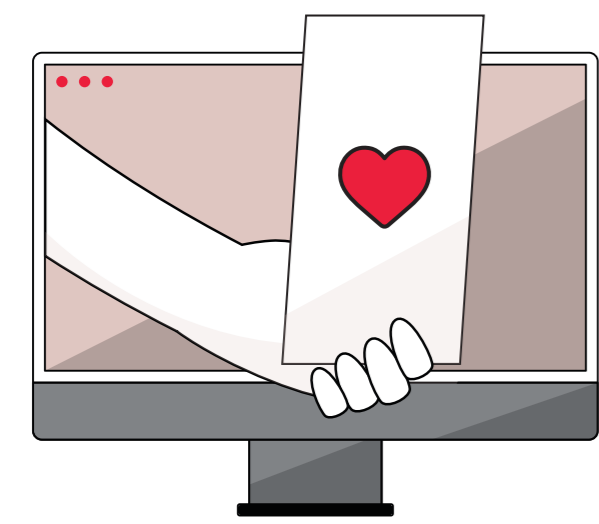

SearchSG

Empowering citizens with an AI-powered search engine to discover accurate and relevant content across government websites.

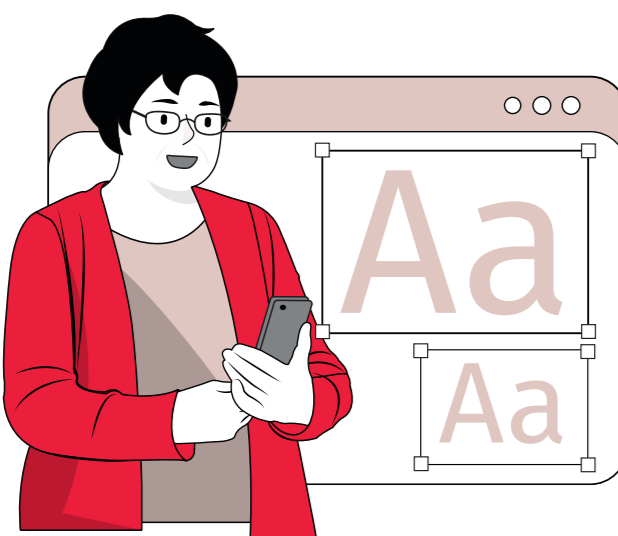

SupportGoWhere

A one-stop platform for people to find government support schemes and services. One key feature is the Care Services Recommender, which suggests appropriate care services and financial support schemes based on caregivers' needs.

RedeemSG

A user-friendly voucher system that simplifies the process for households to claim and use Government-issued vouchers. Since 2020, households have claimed over \$1 billion in Government digital vouchers through RedeemSG.

Purple A11y

An open-source, customisable, automated accessibility testing tool that scans websites to identify potential accessibility issues to ensure people of all abilities can independently use the Government's digital services.

Health Appointment System (HAS)

An integrated system that simplifies the healthcare appointment process, enabling easy scheduling, rescheduling, or cancellation. This user-friendly platform reduces wait times, enhancing overall healthcare access and facility efficiency for a seamless, patient-centric experience.

MyLegacy@LifeSG

A one-stop portal for information and digital services related to end-of-life planning and post-death matters. For instance, citizens who wish to make a Lasting Power of Attorney (LPA) and do Advance Care Planning (ACP) can use the LPA-ACP combined tool to complete both forms together.

Riding the AI Wave

NoteFlow

A tool for transcribing and summarising case interviews, so counsellors can focus on what they do best – providing high-quality care.

Pair

This secure version of ChatGPT helps public servants in tasks such as writing, research, and coding. Since its launch, around 4,000 public servants have regularly accessed Pair for their work.

SmartCompose

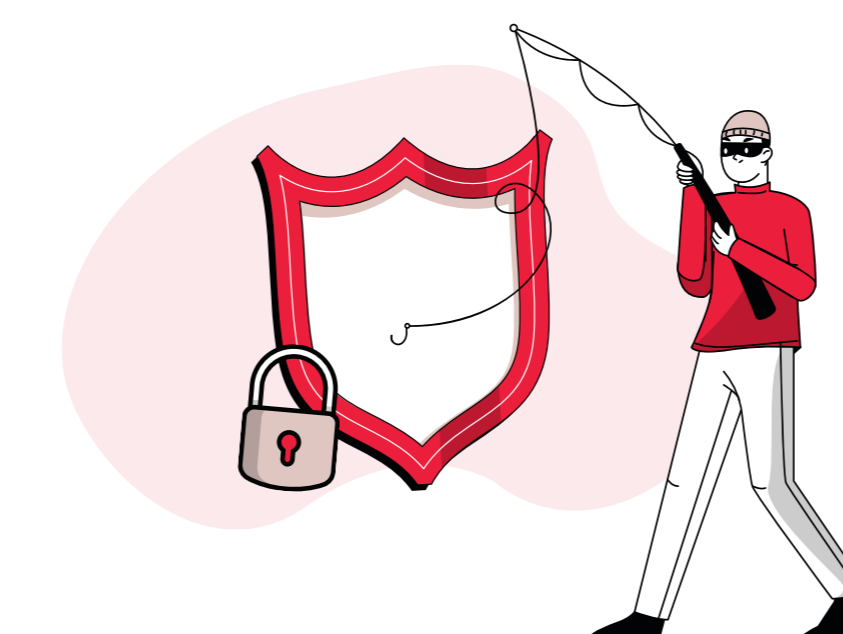

An AI-powered productivity tool that speeds up drafting of email replies to routine queries by suggesting a suitable response based on the citizen's query and referencing the relevant policy.

AI Verify

An open-source AI governance testing framework and software toolkit for companies to test their AI systems and demonstrate responsible use of AI.

Enhancing Safety Measures to Build Trust in Our Digital System

ScamShield

Designed to protect users from scams and fraudulent activities, the ScamShield app has already flagged 6.5 million suspicious SMSes and blacklisted 80,000 phone numbers associated with scams.
